Creative Thinking: Problem Solving Skills and the Arts Orientation

By John F. Wakefield

Ablex Publishing Corp. Hardcover. Book Condition: New. Hardcover. 140 pages. Dimensions: 9.3in. x 6.0in. x 0.6in. This book presents the results of a series of studies of the relationships between thinking skills and the artistic personality. The relationships are explored in fifth grade, eighth grade, 12th grade and college through research with groups and individuals. Logic, insight, divergent thinking and creative thinking are routinely assessed in relation to indications of artistic interest or talent. Although each study is separate in its methods, results converge on a portrait of the developing artist as an individual who finds problems and solves them in his or her own way. The functional definition of creative thinking guides the research, and is validated by the results at all grade levels. The book also furnishes a conception of creative thinking as extremely difficult. This statistical conception is proposed as an explanation for why nonconformity is a common theme in stories by creative individuals—they are distant from the mode, using the distance to achieve self-definition. Educational implications focus on cognitive skills training within the context of the arts and a balance between conventional and exceptional educational experiences to build bridges between arts students and the wider community. This...

Learning models that can improve critical thinking, skills collaborate, communicate, and creative thinking are needed in the 21st-century education era. Critical and creative thinking are the two essential competencies of the four skills required in the 21st century. However, both are still difficult to achieve well by students due to a lack of thinki... Quotes on creative thinking skills and thinking techniques. "Creative thinking and groundbreaking ideas are the answers to yawning dullness and threadbare lifestyles. Lateral thinking skills and new insight allow us to choose alternative paths and unstructured pursuits, wiping out obstacles to the furtherance and refinement of our identity. (An egg every day)". Erik Pevenagie. Rod Judkins, The Art of Creative Thinking. "Most consumers are simultaneously neophilic, curious to discover new things, and deeply neophobic, afraid of anything too new. The best hit makers are gifted at creating moments of meaning by marrying new and old, anxiety and understanding. Orientation: An important evaluation function is to determine whether creative and innovative thinking and problem-solving skills can be developed through training and to assess whether these skills, on their own, are sufficient to ignite innovation in organisations. Research purpose: The evaluation question that the present study aimed to address is whether employees in a corporate context, such as a financial services organisation, can develop creative and innovative thinking and problem-solving skills through an intervention such as a workshop. When creatively thinking, you can develop new solutions or new ways of overcoming a problem that others have not yet thought of. Creative thinking requires a compilation of analytical, problem-solving, organizational and communication skills in order to evaluate and solve a problem. People who have expanded their creative-thinking skills are able to review an item or product from a unique perspective. Even if you don't usually consider yourself a creative person, you can still develop certain skills that allow you to approach goals and obstacles with an innovative mindset. Related: Analytical Skills Creative thinking skills are definitely not just for "creative types" like artists and musicians. Everyone can benefit from creative thinking from time to time. Regardless of whether you view yourself as a creative type or not, you can learn some useful skills and techniques which will enable you to tap into that creative "right brain" thinking and bring a new perspective to innovation, problem-solving and managing change. What is Creative Thinking? They are natural problem-solvers and innovators. However, for most people, creative thinking requires more effort. They prefer to save their creative thinking for when it is really necessary. Taking time to enjoy arts or create something in your leisure time will help you to broaden your horizons more generally. A final thought.
