Description:

"This book is a gem: vivid, fun and thoughtful. It's like sitting next to a skillful, experienced, focused teacher in a real classroom. Kristi and Christine draw on their years of teaching and their dedication to educating children to help students become more empathic and act more thoughtfully and to prepare them with the essentials for success in an uncertain future."

-Arthur Costa, author of Learning and Leading with Habits of Mind

We know how to teach content and skills. But can we teach the habits of mind needed for academic success, a love of learning, and agency in the world? We can, and *A Mindset for Learning* shows us how.

"We want our students to take on challenges with zeal," write Kristi Mraz and Christine Hertz, "to see themselves not as static test scores but as agents of change." Drawing on the work of Carol Dweck, Daniel Pink, Art Costa, and others, Kristi and Christine show us how to lead students to a growth mindset for school-and life-by focusing on five crucial, research-driven attitudes:

- **optimism**-putting aside fear and resistance to learn something new
- **persistence**-keeping at it, even when a task is hard
- **flexibility**-trying different ways to find a solution
- **resilience**-bouncing back from setbacks and learning from failure
- **empathy**-learning by putting oneself in another person's shoes.

A Mindset for Learning pairs research-psychological, neurological, and pedagogical-with practical classroom help, including instructional language, charts and visuals, teaching tips, classroom vignettes, and more.

"This book holds our dreams for all children," write Kristi and Christine, "that they grow to be brave in the face of risk, kind in the face of challenge, joyful and curious in all things." If you want that for your students, then help them discover *A Mindset for Learning*.

People with a growth mindset, as opposed to a fixed mindset, interpret failures as learning opportunities, thereby catalyzing self-improvement. 11. Reward actions, not traits. Tell students when they're doing something smart, not just being smart. 12. Redefine "genius." The myth's been busted: genius requires hard work, not talent alone. 13. Portray criticism as positive. You don't have to use that hackneyed term, "constructive criticism," but you do have to believe in the concept. 14. Dissociate improvement from failure. A mindset training aims to strengthen the belief that abilities are malleable (growth mindset), which has proven to be beneficial for learning. Teachers can support the effects of such a training by establishing a classroom culture in line with the growth mindset idea. Yet, previous training programs have mostly been detached from regular lessons. In this study, a physics teacher implemented a mindset training that consisted of explicit training sessions and implicit training phases. In these implicit phases, the teacher enriched ordinary lessons with growth mindset feedback. We investigated t

A Mindset for Learning: Teaching the Traits of Joyful, Independent Growth draws on the work of Carol Dweck, Daniel Pink, Art Costa, and others, and it pairs research—psychological, neurological, and pedagogical—with practical classroom help, including instructional language, charts and visuals, teaching tips, and classroom vignettes. Today, the book's coauthors—Kristi Mraz and Christine Hertz—describe in detail the work that inspired them. 4:16. 4:16. Mindset: The New Psychology of Success The Growth Mindset Coach: A Teacher's Month-by-Month Handbook for Empowering Students to Achieve I Can't Do That, YET: Growth Mindset Ready-to-Use Resources for Mindsets in the Classroom: Everything Educators Need for Building Growth Mindset Learning Communities Grit: The Power of Passion and Perseverance A Mindset for Learning: Teaching the Traits of Joyful, Independent Growth. According to Carol S. Dweck, Ph.D., author of Mindset, I can do the following— He shares, —Between the deep body of research on the field of learning mindsets and this personal experience with my son, I am more convinced than ever that mindsets toward learning could matter more than anything else we teach.— resilience and optimism to create independent and joyful growth in learning. —There are habits, or stances that we can build in ourselves that will make us more successful and happier— (Mraz, K. and Hertz, C., 2015, p.xviii). The book provides a way to implement the mindset for growth. in the classroom. It first focuses on creating a good ecosystem of energy and engagement in the. classroom with practical methods and examples. Then the teacher must get to know the learners. with talk and purposeful observations. Then you can begin to teach the constellation of stances. first with guided inquir...— A mindset for learning, teaching the traits of joyful, independent growth. Portsmouth, NH: Heinemann.
