Reclaiming Our Children: the Healing Solution for a Nation in Crisis

By Peter Breggin

Perseus Books, Reading, Massachusetts, U.S.A., 2000. Hardcover. Condition: New. No Jacket. From Booklist: Breggin, a medical doctor, explores the issues behind some of the recent troubling behavior of American youth as well as the changing adult attitudes toward children. He starts by examining the Columbine shootings and branches into other distress signals from youth, including the long and sorrowful history of urban youth violence. Breggin views the slow and uncoordinated response to Columbine as a metaphor for the nation's inability or unwillingness to come to grips with the sociological and psychological problems of youth: divorce, racism, alienation, and isolation caused by technology, drug abuse, and neglect. Breggin cautions against relying on counseling and drug therapy to address societal ills, as was suggested in the wake of Columbine. (As it turns out, the shooters had already been involved in counseling and drug treatment.) The nation is addressing troubled youth by "using drugs the way gardeners use herbicides," he writes. Instead, Breggin makes recommendations for improving schools, reducing stress on children, and enhancing parent-child relationships, in short, for reclaiming responsibility for parenting children. Vanessa Bush Book Info Reveals the way to lasting peace with and among children starting with a...

Breggin focuses mostly on the social ills of our society and the social and political context of mental health approaches to children, doing a solid job in this regard. However, a more expansive understanding of health, healing, and reality is needed to help more people realize the wealth of alternatives to drugs. Read more.Â 5 June 2000 - Published on Amazon.com. Dr. Breggin presents a discussion of how American society does a disservice to our troubled school children by labelling them with psychiatric diagnoses and medicating them rather than critically examining the alienation and abandonment caused by family, schools, and communities. For parents, counselors, and educators, a most important chapter is one which offers suggestions for improving our schools. Children have been sliding down our priority list for too long. Busy parents give children leftover timethose few remaining minutes after work and recreation. Stressed teachers have put conformity and good grades ahead of stimulating children to love learning.Â Our children, desperately missing us in their lives, look in the wrong places for solace and support. While only a few become openly violent, many more feel humiliated, frustrated, lonely, and angry. From recasting our attitudes as parents and getting more involved in schools as volunteers, to restructuring class sizes, limiting homework, and fostering honest dialog about the pressures in our society, Reclaiming Our Children shows us the way to lasting peace with and among our children. A long-time critic of mainstream psychiatry, and of the recent near-exclusive emphasis on the biological aspects of mental illness in particular, Peter Breggin makes sure his voice is among the many offering post-Columbine recommendations for the future of America's children by writing Reclaiming Our Children: A Healing Plan for a Nation in Crisis.Â This is not an easy solution or one that earns profits for the mental health establishment and drug companies, Breggin acknowledges; it is simply the most effective and ethical one.

A long-time critic of mainstream psychiatry, and of the recent near-exclusive emphasis on the biological aspects of mental illness in particular, Peter Breggin makes sure his voice is among the many offering post-Columbine recommendations for the future of America's children by writing *Reclaiming Our Children: A Healing Plan for a Nation in Crisis*.^Â This is not an easy solution or one that earns profits for the mental health establishment and drug companies, Breggin acknowledges; it is simply the most effective and ethical one. Our society spend so much time and energy forcing children to do things. School is the worst! There has got to be a better way to educate, discipline and raise healthy children without all the fear, intimidation and forcing things on them that may not really be important to them. To function as a family unit is far more productive for everyone. [Read more](#). One person found this helpful.

From recasting our attitudes as parents to restructuring class sizes, limiting homework and fostering honest dialog about the pressures in our society, *Reclaiming Our Children* shows us the way to profound and lasting peace with and among our children. Beginning with a dramatic shift in adult priorities that places children at the center of our lives, Peter Breggin demonstrates how we can dedicate ourselves to creating meaningful, loving, disciplined, and inspiring relationships with all of our children. (more). all members. 3/4Members. *Reclaiming Children and Youth* offers a vast array of strategies and solutions to many of the pressing problems of youth work today. Using tried and tested models, it presents techniques to reclaim even the most challenging children and youth. Children have been sliding down our priority list for too lo... Our children, desperately missing us in their lives, look in the wrong places for solace and support. One of the most powerful accounts of the crisis of our schools/children/families (and seemingly accurate account of our dangerous and misfocused attention to making suffering or sheer emotions, pathology) in this country...amazing author/psychiatrist. flag 2 likes Like see review. Mar 12, 2018 Michael Sullivan rated it it was amazing. Shelves: favourites, critical-psychiatry-drugcorruption, peter-breggin. Another fantastic book by Breggin. Nations have slightly different considerations, among them a strong national identity that's based on language, culture, or other factors, as well as core values, such as democracy. To prove its point, *Upheaval* speeds through several case studies of countries that have suffered traumatic events: Japan in 1853, when Americans forced it to open its feudal society to the West; Indonesia in 1965, after a coup; Chile in 1973, when President Salvador Allende was overthrown; and a more dragged-out crisis in Australia during its painful distancing from the U.K. during and after World War II. Perhaps most interesting to longtime readers will be Diamond's own tale of personal crisis, which was clearly an inspiration for the book.

"So many (children) are signalling their suffering in so many ways, with hardly anyone taking notice." "Should the threat of violence lead the nation to turn its schools into mental hospitals - or are there better approaches...?" He criticizes efforts to reduce stigma toward mental illness in children. "These extraordinary pronouncements [that mental illness is rooted in biology] rendered parents irrelevant, gutted family life of any meaning, and rejected common sense..." and "shut the door on children." Remember that your children are not only your own property, but also the property of the nation. They are the property of all of society and that society has the right to control your conduct! Czech and German nationalists in the Bohemian lands were hardly alone in claiming that children comprised a precious form of national property (nationaler Besitz, národní majetek) at the turn of the century. In an age of mass politics and nationalist demography, nationalists across Europe obsessed about the quantity and quality of the nation's children.
