Beginning with the chaotic post-World War I landscape in which religious belief was one way of reordering a world knocked off its axis, 'Sacred Causes' is a sweepingly assured critique of how religion has often been camouflaged by politics. Covering a vast canvas, Burleigh examines the many 'secular' religions the twentieth century produced, anal

Nazism and Communism were classic examples of political religions; they were messianic movements that offered redemption in an earthly manner. Both movements attempted to displace religion. In the interwar period religion became a symbol of a discredited past. People looked to science and militant nationalism to deliver them from the depths of the economic depression. He thinks Tariq Ramadan is an apologist for al-Qaeda. His take is more than a little unbalanced. He fails to note that Islam, like Christianity, is made up of many different strains. Religion is one of the most ancient, sacred and time tested institution in society that is used as an instrument of social control. Religion espouses certain values and ethics which serve as a yardstick to measure our actions against. People feel that there is some power, or institution wielding immense power to which we are accountable to. In such a situation people would think before committing certain acts which are not accepted by the society. Here children were wrongly indoctrinated about Islam facing a threat from the western world. These children were taught about Jihad and the need to fight to against the west. The Al Qaeda then recruited the same boys who were then given military training. These were the people who then carried out terrorist activities. In This Review. The great nineteenth-century social thinkers argued that the rise of modern industrial society entailed the decline of religion. Modernization has indeed involved the rise of rational-bureaucratic states and the gradual displacement of ecclesiastical authority with that of professional and technocratic elites. The authors predict that this "expanding gap" between sacred and secular societies will have serious consequences for world politics, but they do not venture specific guesses about what is to come. London: Harper. xviii + 557 pp. ISBN 0007195745. Unfortunately, Michael Burleigh's Sacred Causes: Religion and Politics from the European Dictators to Al Qaeda fails to live up to that promise. Too opinionated and polemical to be a serious history, but lacking the wit and pace to be a decent polemic, it has the vices of both and the virtues of neither. At times Sacred Causes reads like it has been spliced together from the manuscripts of two different authors: one an academic historian, the other a right wing newspaper columnist. Burleigh is of course both, but his failure to reconcile these different personas for the purposes of this book p Sacred Causes book. Read 23 reviews from the world's largest community for readers.
