

PROCEEDINGS OF SPIE

Optomechanical Engineering 2017

Alson E. Hatheway
David M. Stubbs
Editors

9–10 August 2017
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 10371

Proceedings of SPIE 0277-786X, V. 10371

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optomechanical Engineering 2017*, edited by Alson E. Hatheway, David M. Stubbs, Proceedings of SPIE Vol. 10371 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 ADHESIVES AND MATERIALS

- 10371 02 **Adhesive bonds for optics: analysis and trade-offs** [10371-1]
10371 03 **Advancements in adhesive mounting of optics** [10371-2]
10371 04 **ZERODUR - bending strength: review of achievements** [10371-4]

SESSION 2 ELEMENTS

- 10371 05 **2- μ m optical time domain reflectometry measurements from novel Al-, Ge-, CaAlSi-doped and standard single-mode fibers** [10371-5]

SESSION 3 OPTOMECHANICAL ANALYSIS I

- 10371 06 **LLIMAS: revolutionizing integrating modeling and analysis at MIT Lincoln Laboratory** [10371-7]
10371 07 **The compound diffraction grating in the Ivory optomechanical modeling tools** [10371-8]
10371 08 **Linear analysis using secants for materials with temperature dependent nonlinear elastic modulus and thermal expansion properties** [10371-9]

SESSION 4 OPTOMECHANICAL SYSTEMS I

- 10371 09 **System engineering of complex optical systems for mission assurance and affordability** [10371-10]
10371 0B **HabEx primary mirror trade studies** [10371-12]

SESSION 5 STABILITY AND ALIGNMENT

- 10371 0C **Design and test of precision vertical and horizontal linear nanopositioning flexure stages with centimeter-level travel range for x-ray instrumentation** [10371-13]
10371 0D **Trajectory error analysis of a flexure pivot type guide for linear nanopositioning** [10371-14]

- 10371 OE **The development of alignment turning system for precision len cells** [10371-15]
- 10371 OF **Lithography lens mounting flexure number design and aberration analysis** [10371-16]
- 10371 OG **Double Arm Linkage precision Linear motion (DALL) Carriage, a simplified, rugged, high performance linear motion stage for the moving mirror of an Fourier Transform Spectrometer or other system requiring precision linear motion** [10371-17]

SESSION 6 OPTOMECHANICAL ANALYSIS II

- 10371 OH **Analysis technique for controlling system wavefront error with active/adaptive optics** [10371-18]
- 10371 OI **Using integrated models to minimize environmentally induced wavefront error in optomechanical design and analysis** [10371-19]
- 10371 OJ **Using multi-disciplinary optimization and numerical simulation on the transiting exoplanet survey satellite** [10371-20]

SESSION 7 MOUNTING

- 10371 OK **Adaptive optics mounting method for higher second harmonic generation efficiency of large aperture KDP crystal** [10371-21]
- 10371 OM **Cryogenic, infrared, optical beamsplitter wavefront error analysis and test** [10371-23]

SESSION 8 OPTOMECHANICAL SYSTEMS II

- 10371 ON **Optomechanical design of TMT NFIRAOS Subsystems at INO** [10371-24]
- 10371 OO **Recent advancements in robotic micro-optical assembly at the Lockheed Martin Optical Payload Center of Excellence** [10371-25]
- 10371 OP **The opto-mechanical design process: from vision to reality** [10371-26]
- 10371 OR **Comparison of lenses' thermal expansion formulation in Zemax versus ANSYS with SigFit post processing** [10371-34]

POSTER SESSION

- 10371 OS **Mirrors design, analysis and manufacturing of the 550mm Korsch telescope experimental model** [10371-29]
- 10371 OT **Optimization of a 16 inches diameter primary mirror assembly of a ground-based telescope** [10371-30]

- 10371 0U **Development of an athermalized optomechanical system of large aperture remote sensing instruments** [10371-31]
- 10371 0V **Removal of diamond turning marks with magneto-rheological finishing** [10371-32]
- 10371 0X **Large area of MCP electronic rinse system design** [10371-6]

An opto-mechanical engineer is not just providing a holder or mount for optical components. Improperly mounting can cause stresses or distortions for component surfaces and degrade system performance under operating environment conditions. Shanghai Optics has more than 55 years of experience in designing and manufacturing opto-mechanical products. We offer cost-effective solutions and fast delivery services for our customers. Our engineering design experience and streamlined production methods help us create optimum design and production processes. Comparing with other optical manufacturers, w Opto Engineering is your partner for machine vision applications with laboratories equipped to perform feasibility studies all over the world. Tagged: applications, Automation, Automotive industry, inspection, Pharmaceutical industry. Posted in: EXE.Â Opto Engineering has been organizing training courses for its customers for years, to share know-how and experience. We have collected material, prepared presentations and now is time to share them with you! Tagged: Training courses. 30+ days ago - req13879. Opto-Mechanical Production Engineer (1st shift) @ ASML. Manufacturing. Apply now.Â Job Mission. This position is for a Senior Electrical Engineer with innovative attitude to work in Manufacturing Test Engineering. Candidate will work with development engineers to implement comprehensive production test that incorporates a high level of performance verification and troubleshooting diagnostics. ASML is a world leader in the manufacture of advanced technology systems for the semiconductor industry. ASML's corporate headquarters is in Veldhoven, the Netherlands.
