#### Description:

Written by Beverly Otto, *Language Development in Early Childhood Education, 4/e* efficiently combines theory, research, and practice to provide a solid foundation for understanding language development in children birth through age eight. A comprehensive resource, it focuses on the development of phonological, semantic, syntactic, morphemic, and pragmatic language skills, children's understanding of written language, and ways in which this acquisition process can be enhanced in early childhood settings. Exact guidance on how to develop classrooms and other learning environments that enhance children's language development is

also provided. *Every chapter begins with interesting vignettes* of young children's language development, and throughout all the chapters, readers will discover anecdotal narratives to illustrate key concepts and interaction strategies.

During early childhood, children's abilities to understand, to process, and to produce language also flourish in an amazing way. Young children experience a language explosion between the ages of 3 and 6. At age 3, their spoken vocabularies consist of roughly 900 words. By age 6, spoken vocabularies expand dramatically to anywhere between 8,000 and 14,000 words. Language development allows your child to follow directions as well as express their needs and wants. As your child learns to communicate effectively they will be less frustrated and you will most likely see a decrease in temper tantrums. Now think about that from your little one's point of view as they try to learn how to speak for the FIRST time. Do not count on the TV for learning language. Babies don't understand it like we do! Providing your child with a rich language environment is the best way to encourage language development in early childhood. This easy and excellent strategy should be at the top of your list for strategies to promote language development. Modeling Language for Toddlers. Dual language education programs are designed to help all students learn through two languages to develop bilingualism and biliteracy, high levels of academic achievement, and multicultural competence (Christian, 2011). It is more commonly referred to as Dual language because it was a safer term that would not cause so much opposition compared to using the word bilingual.
