You are here: Qualitative Research Methods for the Social Sciences. On this page. Admitted to the course. Univ: Courses of the amount of 90 ECTS credits in Social Sciences (Business Administration 90 ECTS, Economics 90 ECTS, Economic History 90 ECTS, Pedagogy 90 ECTS, Gender Studies 90 ECTS, Human Geography 90 ECTS, Informatics 90 ECTS, Peace and Conflict Studies 90 ECTS, Political Science 90 ECTS, Psychology 90 ECTS, Social Administration 90 ECTS, Social Care 90 ECTS, Social Policy 90 ECTS, Social. Qualitative research comprises of the following methods: logic, ethnography, discourse analysis, case study, open-ended interview, participant observation, counseling, therapy, grounded theory, biography, comparative method, introspection, casuistry, focus group, literary criticism, meditation practice, historical research, etc. [Cibangu, 2012]. Recently interest in social sciences of qualitative research is growing remarkably. The rapid rise of qualitative research to prominence in scientific communities; considerable debate has ensued regarding epistemological, philosophical, and methodological issues [Spencer et al., 2003]. Literature Review. This study analyzes the qualitative research methodology for the new researchers. Qualitative, nonstatistical social science research can form the basis of surprising and profound discoveries about individuals and societies. Through smallscale studies, the need for larger studies is exposed. Narratives, confessions, ethnographies, demographic studies, case studies, and more recently, focus groups contribute insight and depth to our understanding of the human condition. The central goal of this course is preparing student researchers to design qualitative methods projects. In class, you will develop research goals, observe data collection and practice interviewing. A part of Silverman, David: *Interpreting Qualitative Data. Methods for Analyzing Talk, Text and Interaction*, Thousand Oaks, Calif.: Sage, 2006 Wolff, Stephan: "Ways into the field and their variants", in Flick, U./ von Kardoff, E./ Steincke, I. (eds.): *A companion to qualitative research*, Sage Publications Ltd. 2004, pp. 195-202. Some first observations on qualitative inquiry and the particularities of the qualitative approach in the social sciences will be discussed. 3. The particularity of qualitative research is that the research question can evolve during the research process. It can be refined and reformulated in the process of data gathering and early data analysis. Required reading.
