INTRODUCTION, METHODS AND SCOPE

It has not been possible to quote them as evidence of what was said or done. These inscriptions were usually carved at the time that a public building was under construction, but the individual inscriptions themselves are not always contemporary with the building. There are many cases where inscriptions were erected at a later date. All the inscriptions have been seen through copies from antiquity through the Middle Ages, and in several cases the result of their transmission to us is very doubtful. In many cases the inscription has been reconstructed from a copy made by a scholar in the eighteenth or nineteenth century. There is a great deal of uncertainty about the text of many inscriptions, and in some cases the text is so uncertain that it is not possible to use them as evidence of what was said or done. In some cases the inscription was found in a very poor state of preservation, and the text is so uncertain that it is not possible to use them as evidence of what was said or done. In historiography, ancient Rome is Roman civilization from the founding of the Italian city of Rome in the 8th century BC to the collapse of the Western Roman Empire in the 5th century AD, encompassing the Roman Kingdom (753 BC–509 BC), Roman Republic (509 BC–27 BC) and Roman Empire (27 BC–476 AD) until the fall of the western empire. The civilisation began as an Italic settlement in the Italian Peninsula, traditionally dated to 753 BC, that grew into the city of Rome and which subsequently gave its name. As time went by, new religions and cults became popular in the Roman world: the Eleusian Mysteries and cult of Orpheus from Greece; the cult of the Egyptian goddess Isis; the religion of Mithras, from beyond the empire, in Iran; and later, Christianity. Despite (or because of?) often fierce persecution, Christianity spread around the empire, and by the third century Christians probably made up a sizable minority of the population. However, it was the conversion to Christianity of the emperor Constantine, and the favor bestowed on the Christian Church by succeeding emperors, that turned it into HISTORYHIT.TV A new online only channel for history lovers. Sign Me Up. Rome wasn't built in a day, as the cliché reminds us. Neither did the greatest power of the ancient world fall in one swift cataclysm as some past historians believed. The history of Rome is long and complex: a village grew into the Eternal City that's still a wonder today; a monarchy became a republic and then an empire; Italy was conquered before Europe, parts of Africa and the Near and Middle East were incorporated into an empire that had around a quarter of the world's population under its governance. This 1,000-year-old Ancient Rome: A New History, by Dr. David Potter -- Professor of Greek, Latin, and Roman history at the University of Michigan and an internationally recognized authority on the Roman Empire -- narrates the spectacular evolution of Roman power from its earliest days as a city-state along the banks of the Tiber to its decline and fall after the reign of Justinian. Potter's work affords an introductory but lively overview of Roman history in only 368 pages (something which is a feat in unto itself). In this revised and expanded second edition of Ancient Rome, Potter draws upon new sources and d
