No part of the contents of this book may be reproduced or transmitted in any form or by any means without the written permission of the publisher. A part of Microsoft Office 2013, Microsoft SharePoint 2013 is a server-side product that provides a powerful toolset for organizing websites and content, sharing knowledge, connecting with others, providing robust collaboration environments, managing documents, and finding information and people. Microsoft SharePoint 2013 Step by Step offers a comprehensive look at the capabilities and features of SharePoint 2013 that people will use most frequently. Who this book is for. Wiki > TechNet Articles > SharePoint 2013: Installation Step by Step. SharePoint 2013: Installation Step by Step. Article. History. SharePoint 2013: Installation Step by Step. Table of Contents. Software Prerequisites. Download Location. Steps. References. Software Prerequisites. 1. Download and unzip the files ISO file the SharePoint Server 2013 setup. 2. Way to install Prerequisite: Run the setup file and you will get a link 'Install Software Prerequisites'. Or you can click on Prerequisite icon within ISO file. 3. Server will be restarted at the time of prerequisites installation. With the release of SharePoint 2013 comes a whole new raft of technologies to understand and implement. This eBook will go through the setting up of SharePoint 2013 itself from creating the setup accounts to the actual install of the software. The eBook will also cover the setup and implementation of the new Microsoft Workflow Manager and Office Web Apps which now run as separate servers and are accessed by SharePoint 2013. This eBook uses a very simple infrastructure model which is ideal for demonstrating the techniques for installing SharePoint 2013 and its associated servers, but this model should not be used in a production environment. Set Up and Install SharePoint 2013 Learn the SharePoint 2013 Installation process step by step. The release of SharePoint 2013 comes a whole new raft of technologies to understand and implement. This eBook will go through the setting up of SharePoint 2013 itself from creating the setup accounts to the actual install of the software. The eBook will also cover the setup and implementation of the new Microsoft Workflow Manager and Office Web Apps which now run as separate servers and are accessed by SharePoint 2013. About the Author I have 3 VMs in Microsoft Azure for SharePoint 2013 on-premises environment – All-up SharePoint 2013 VM with AD and SQL, ADFS+Azure AD Sync VM for SAML provider, and WAP VM acting as reverse proxy. This environment is trusted by Office 365 tenant syncing on-premises users in Office 365 and configured with both in-bound and out-bound SharePoint search. Here are the high level steps one needs to take and consider while building end-to-end SharePoint 2013 hybrid lab. Prepare AD, DNS and Domain requirements. Procure Public SSL certificates – Plan to have either Wildcard or UCC/SAN certificates for
