The Textbook of Medical Biochemistry for the medical students is the outcome of the joint efforts of a medical and a nonmedical biochemist, who possess considerable experience in teaching biochemistry to undergraduate and postgraduate medical students of Indian universities. We have tried our utmost to ensure that the language used is lucid and simple, makes an easy-reading, and the text provides an intelligent and comprehensive study. At the same time, we have attempted to maintain a high standard after incorporating the recent developments and concepts. Though the book is primarily meant for Essentials of Medical Biochemistry, Second Edition: With Clinical Cases is the most condensed, yet detailed biochemistry overview available on the topic. It presents contemporary coverage of the fundamentals of biochemistry, emphasizing relevant physiologic and pathophysiologic biochemical concepts. Pivotal clinical case studies aid in understanding basic science in the context of diagnosis and treatment of human diseases, and the text illuminates key topics in molecular immunology and hemostasis. In this book have comprehensively covers fundamental concepts of biochemistry in a relevant and user friendly manner for undergraduate medical and dental students as also the students of biochemistry, life sciences and paramedical courses. It also distinctively highlights the biomedical significance of various important topics of biochemistry to help the readers in imbibing the biochemical basis of human disease and to apply this knowledge in understanding the various aspects of medicine.
