Description:

Written by Beverly Otto, *Language Development in Early Childhood Education, 4/e* efficiently combines theory, research, and practice to provide a solid foundation for understanding language development in children birth through age eight. A comprehensive resource, it focuses on the development of phonological, semantic, syntactic, morphemic, and pragmatic language skills, children's understanding of written language, and ways in which this acquisition process can be enhanced in early childhood settings. Exact guidance on how to develop classrooms and other learning environments that enhance children's language development is

also provided. *Every chapter begins with interesting vignettes* of young children's language development, and throughout all the chapters, readers will discover anecdotal narratives to illustrate key concepts and interaction strategies.

During early childhood, children's abilities to understand, to process, and to produce language also flourish in an amazing way. Young children experience a language explosion between the ages of 3 and 6. At age 3, their spoken vocabularies consist of roughly 900 words. By age 6, spoken vocabularies expand dramatically to anywhere between 8,000 and 14,000 words.
