Description:

The **Third Edition** of Brinkmann and Kvale's **InterViews: Learning the Craft of Qualitative Research Interviewing**, offers readers comprehensive and practical insight into the many factors that contribute to successful interviews. The book invites readers on a journey through the landscape of interview research, providing the "hows" and "whys" of research interviewing, and outlines paths for students to follow on the way to research goals. Thoroughly updated to account for all recent developments in qualitative interviewing, the **New Edition** expands its focus on the practical, epistemological, and ethical issues involved in interviewing, while

maintaining the fluid and logical structure it has become known for throughout the text.

An interview in qualitative research is a conversation where questions are asked to elicit information. The interviewer is usually a professional or paid researcher, sometimes trained, who poses questions to the interviewee, in an alternating series of usually brief questions and answers. They can be contrasted with focus groups in which an interviewer questions a group of people and observes the resulting conversation between interviewees, or surveys which are more anonymous and limit respondents to In qualitative research methods, interviews help you to get a deeper understanding of social trends as compared to the data collected using quantitative methods such as questionnaires. Therefore, interviews are appropriate in those scenarios where you have basic knowledge about the research topic and you want to establish a deeper understanding of it. Interviews can also be used to conduct information about such topics where the respondent is very shy or does not feel comfortable to talk about it among a group of people. For example, if you want to collect data about the "psychological process 5.0 out of 5 stars Interviews: Learning the craft of qualitative research interviewing.
