Think Like a Nurse: A Holistic Approach to Psychiatric Nursing

Psychiatric-Mental Health Nursing: From Suffering to Hope takes a new approach to educating psychiatric nurses, teaching them how to guide patients from a place of despair to a new beginning. Students will learn to speak like a competent, caring nurse and communicate effectively and compassionately with their patients. A unique chart outlines what nurses might be thinking, feeling, and perceiving during encounters with patients, enabling nurses to facilitate more useful discussions and understand their own feelings. Mental health and psychiatric disorders are presented in terms of how they impact Five Domains of Wellness rather than as isolated conditions. Based on the idea that mental health patients do get better, this text offers a human, holistic way to care for patients.

Psychiatric-Mental Health Nurse Practitioners (PMHNPs) are advanced-practice registered nurses who provide comprehensive mental health care to patients suffering from behavioral problems and mental health disorders. Not only do PMHNPs provide diagnostic care and treatment, they also focus on psychiatric/mental health maintenance and wellness. If they wish to go into teaching or administration, the DNP may be the better fit. Prospective students are encouraged to consider their career goals and research programs accordingly. Find an ACEN or CCNE-accredited Psychiatric-Mental Health Nurse Practitioner program. Online, hybrid, and classroom-based programs are all available. She is ANCC certified as a family psychiatric-mental health nurse practitioner and as a clinical nurse specialist in adult psychiatric-mental health nursing. She is abundantly blessed by her life's calling. Dr. Potter's professional interests include group work, crisis intervention, stress management, chronic illness, pain management, suffering, grieving, spirituality, older adults, medical missions, camp nursing, and nursing theory.
