#### Description:

***Case Studies in Dental Hygiene, Third Edition***, is designed to guide the development of critical-thinking skills and the application of theory to care at all levels of dental hygiene education—from beginning to advanced students. This textbook is designed to be used throughout the dental hygiene curriculum. Because the questions and decisions regarding treatment of each case span the dental hygiene sciences and clinical practice protocols, this book will find a place in enhancing every course required of dental hygiene students. Introducing this text at the beginning of the educational experience may help the student realize early on the link between theory and patient care. Students then progress through the program with a heightened awareness of evidence-based practice.

Students also perceive an increase in confidence regarding preparation for board examinations when they have been given the opportunity to practice case-based decision making. *Case Studies in Dental Hygiene, Third Edition*, is a viable study guide to help students prepare for success on national, regional, and state examinations with a patient care focus. This revised edition also is an excellent review text for the graduating dental hygiene student who is preparing to take the National Board Dental Hygiene Examination.

Case Studies : Dental Marketing Case Studies for Group practices, Aquisitions, Start-ups, and Specialists. Learn how we can build your patient base. When we first began working with the Reimels Dental Group they only had six practices. They were looking to grow aggressively and were primarily concentrating on SEO, PPC, and Social Media. Their primary challenge was that not all of their practices were under the same name. This meant we had to help the marketing director research the demographics of each area and provide a different strategy for each mailing. We began working with only three of their practices to help prove out the concepts and show the power of direct mail. In less than six months, direct mail was their main source of adver These in-depth case studies have been designed specifically for dental hygiene students. Each case includes the patient documentation (Patient History and Periodontal Charting) and images (Radiographs and Intraoral images). These case studies may be used in a number of ways, such as:

- Individual study followed by in class testing.
- Group study followed by classroom presentation.
- Classroom review and discussion.

Above all, our hope is that these cases will provide you with insights into the complex issues involved in patient care.

1. 42-year old African-American female. Case Studies. Introduction. The cases presented in this section are designed to stimulate discussion of the various dental materials that are used to restore or replace teeth. The questions involve not only dental materials but clinical dental hygiene as well. Maintenance of restorations, prostheses, and oral tissues should also be considered. Case 1. The patient is a 63-year-old woman with a maxillary denture, and the appliance is presented in Figure CS1.1. She lives on a very limited income but visits the dental office yearly for a thorough dental examination and oral prophylaxis. At this vi

Case Studies in Dental Hygiene has been added to your Cart. Add to Cart. Buy Now. This book was extremely helpful while studying for the National Dental Hygiene Board Exam. This book includes the story of the patient, their medical history, periodontal and hard tissue chart, intra-oral photos and radiographs. The questions are great and I was happy with the answer portion because it gave an explanation why it was that answer. I really enjoyed the different patient categories as well. I felt very prepared for the case study portion of the exam because of this book. Read more. 6 people found this helpful. Case Studies. Introduction.
