IA.IUI. 1936 the american radio relay league, inc west hartford. CONNECTICIJr. Co pyrightl 1936. Amateur or ham radio operators began experimenting with long range radio and pretty soon were regularly contacting other hams over the Atlantic in Europe. It didn't take long after that before more regulation started to narrow the bands that hams could use. Eventually, the IARU (International Amateur Radio Union) was established to regulate ham radio operations around the world and specific frequency bands were allocated for exclusive amateur use for all the signatory countries. When ham radio operators were given the frequencies of 200 meters and down to use, those frequencies were considered to be useless. The reliable range of the most powerful spark transmitters at that time was considered to be 50 or 100 miles. Amateur radio licensing in the United States - Contains history of U.S. amateur licensing by the Department of Commerce, the Federal Radio Commission and finally by the Federal Communications Commission. Etymology of ham radio. Women in early radio. 200 Meters and Down: The Story of Amateur Radio. West Hartford, Connecticut, USA: American Radio Relay League. ISBN 0-87259-001-1. 200 Meters & Down. The Story of Amateur Radio! This book chronicles the exciting evolution of Amateur Radio from the pioneers who perfected the wireless art, through the technical advances of the mid-1930s. 192 pages. © 1936, 1981, 2001, The American Radio Relay League, Inc.
