Vowels vs Consonants When it comes to the purpose of usage, there exists a considerable difference between vowels and consonants. Vowels and consonants are. They have to take the help of the vowels to form meaningful words. The word consonants mean "that which take the help of the vowels or the consonants." Consonants are of five types. They are called gutturals that arise from the throat such as "k" and "g"; palatals that arise from the hard palate such as "j" and "s"; cerebral that arise from the roof of the palate such as "d" in "door" and "t" in "total"; dentals that arise from the teeth such as "th" in "through"; the labials that arise from the lips such as "p" in "plate" and "m" in "mall".

This book would be great to use to teach kids the difference between vowels and consonants. Like - see review. Dec 05, 2015 John Schlotfeld rated it liked it - review of another edition. Shelves: kid-lit, read-in-2015, eli-s-books. This is the perfect book if you don't just want to teach your child about consonants and vowels but also class warfare, conventional warfare, the perils of being caught in the middle (poor Y), and the power of uniting against something complicated you don't understand. I still give it three stars. Like - see review. Apr 09, 2016 Chelsea Smith rat
