2009; ISBN 81-7646-667-0; Rs. 1500 (Set)

**Volume – 1: Understanding Development Communication
&
Volume – 2: Advanced Development Communication**

By

Kiran Prasad

About the Book: Communication for development is a broad cognitive field of enormous international, national and regional interest attracting attention as a special field of study by students and researchers across disciplines. New media and communication convergence are reshaping the ways in which communication can be used in development infusing renewed interest in the field as a subject of serious academic study. This book includes these new developments and has been designed keeping in mind the UGC Core Curriculum for the course *Communication for Development* offered at the Masters Degree for students of Journalism, Mass Communication, Electronic Media, Visual Communication, Public Relations and Advertising Studies.

The first volume of the book *Understanding Development Communication* links theory, policy and the practice of communication for development. This volume discusses various theories of development communication followed by communication for rural development and social movements, the use of information and communication technologies in development from the early SITE experiment to the Internet. This volume integrates theory and praxis with a distinct focus on India in moving *development communication to empowerment communication*.

The second volume of the book *Advanced Development Communication* links theory, policy and action on several thrust areas of development communication including women's empowerment, health communication, family welfare and population communication, environmental communication, the digital divide, political economy, and development communication ethics. It raises several fundamental questions on development communication policy for furthering research and action studies to improve the quality of life of people in the developing world.

The interdisciplinary scope of the book makes it an ideal text for a wide range of disciplines including communication, journalism, electronic media studies, development studies, sociology, social work, extension studies, rural development, population studies and social policy.

Content

Preface

List of Figures and Tables

What communication for development looks like from different perspectives, including international labour standards, environmental issues, and donor relations. All about cross-platform storytelling. Participants will be challenged to work on communication initiatives, which may involveÂ The trainers are international experts in communication, training, and development. Participants flex their creativity in an innovative space through collaborative projects, hands-on exercises, and interactive speaker sessions. Communication for Development (C4D) is all the different types of communication that need to take place in societies if sustainable democratic development is to occur. The approach to Communication for Development (C4D) has evolved over the years. Initially developed after World War II as a tool for diffusion of ideas, communication initiatives primarily involved a one-way transmission of information from the sender to the receiver. This includes large-scale media campaigns, social marketing Communication for Development and Social Change (CDSC) has been a dynamic field where there is still a lot to explore and many ideas are yet to crystalize. A lot of scholars have proposed different frameworks at different points in time more. Communication for Development and Social Change (CDSC) has been a dynamic field where there is still a lot to explore and many ideas are yet to crystalize.

Development Communication is communication with a social conscience. Development communication is associated with rural problems, urban problems and takes humans into account.Â Nora Quebral (1975) defined development communication as the art and science of human communication applied to the speedy transformation of a country from poverty to a dynamic state of economic growth and makes possible greater economic and social equality and the larger fulfilment of human potential. We at Communication for Development Ltd specialise in servicing the communication needs of international development organisations and businessâ€™ corporate social responsibility (CSR) divisions. We are a global team of visual storytelling experts, headquartered in London in the UK. Our combination of stunning creativity, impressive technical ability and a solid understanding of both development and CSR issues equips us to produce visual content thatâ€™s both engaging and relevant. Our MSc Communication for Development aims to develop the knowledge and skills to support positive change through communication. Rapid changes in the communication landscape â€“ technologies, communication processes, and communication opportunities â€“ offer new ways to understand and improve livelihoods, poverty reduction, and governance. Understanding how communication can support individual and social change can lead to more effective and dynamic development practice. Communication for Development (C4D) is a broad term used to refer to all the different types of communication that need to take place in societies if sustainable democratic development is to occur. The approach to Communication for Development (C4D) has evolved over the years. Initially developed after World War II as a tool for diffusion of ideas, communication initiatives primarily involved a one-way transmission of information from the sender to the receiver.
