

EXPLORATION & EMPIRE : The Explorer and the Scientist in the Winning of the American West

By Goetzmann, William H.

Alfred A. Knopf, New York, NY, 1966. Hard Cover. Book Condition: New. No Jacket. First Edition, Thus. BRAND NEW Copy less dustjacket. Upper text edge dyed green. Pulitzer Prize (1967) work of historian William H. Goetzmann (1931 -). Intellectual history. A consideration of the history of America's westward exploration "as an activity rather than a sequence of discoveries". Volume focuses on "exploration as a meaningful activity and to trace its complex impact" on the history of the west and the nation as a whole, and additionally, consider the explorer, beyond descriptive analysis, as a man of particular time and place. 16 chapters in 3 parts: I, Exploration & Imperialism: 1805 - 45; II, The Reconnaissance & Manifest Destiny: 1845 - 60; and, III, Exploration & the Great Surveys: 1860 - 1900. A case study in historiography. Stated First Edition.

In his Pulitzer Prize-winning *Exploration and Empire*, William H. Goetzmann analyzes the special role the explorer played in shaping the vast region once called "the Great American Desert." According to Goetzmann, the exploration of the West was not a haphazard series of discoveries, but a planned - even programmed - activity in which explorers, often armed with instructions from the federal government, gathered information that would support national goals for the new lands. [@inproceedings{Goetzmann1966ExplorationAE, title={Exploration and Empire: The Explorer and the Scientist in the Winning of the American West}, author={William H. Goetzmann}, year={1966}}](#). William H. Goetzmann. The story of North American exploration spans an entire millennium and involves a wide array of European powers and uniquely American characters. It began with. Moreover, in the latter half of the fifteenth century, war between European states and the Ottoman Empire greatly hampered Europe's trade with the Orient. The desire to supplant the trade moguls, especially the Italians, and fear of the Ottoman Empire forced the Atlantic nations to search for a new route to the East. Portugal: Bartolomeu Dias, Vasco de Gama and Pedro Álvares Cabral. Portugal led the others into exploration. THE exploration of the American West, William H. Goetzmann insists in this skillful synthesis of a century's outpouring of diaries, reports, monographs and scholarly studies, was not a series of isolated, haphazard adventures, but rather was a calculated ("programmed" is Mr. Goetzmann's word) gathering of information for the public good, as "good" was interpreted by the shifting national culture. and national needs of the time. The story of North American exploration spans an entire millennium and involves a wide array of European powers and uniquely American characters. It began with the Vikings' brief stint in Newfoundland circa 1000 A.D. and continued through England's colonization of the Atlantic coast in the 17th century, which laid the foundation for the United States of America. The idea of "America" antedated America's discovery and even Viking exploration. That idea had two parts: one paradisiacal and utopian, the other savage and dangerous. The Dutch also planted trading colonies in the West Indies. England: John Cabot and Sir Walter Raleigh. Yet the earliest explorers of America were not English, Spanish, or French. The first European record of exploration in America is in a Scandinavian language. The Old Norse Vinland Saga recounts how the adventurous Leif Eriksson and a band of wandering Norsemen settled briefly somewhere on the northeast coast of America -- probably Nova Scotia, in Canada -- in the first decade of the 11th century, almost 400 years before the next recorded European discovery of the New World. The first known and sustained contact between the Americas and the rest of the world, however, began with the famous voyage of famous explorers and the Exploration of America. Facts and information about the Exploration of America. The Exploration of America Events in Europe led to the discovery and the subsequent Exploration of America. New lands and new trade routes brought wealth and riches to the countries in Europe. This opened the door for European countries to build empires and gain power. There were constant wars and power struggles in Europe. Their policies of Colonialism and Imperialism were designed to forcefully extend a nation's authority, power and influence by territorial gain and by the establishment of economic and political dominance. Source for information on Exploration and Explorers: Encyclopedia of the New American Nation dictionary. Five groups of explorers were involved in scientific, geopolitical or imperial, and economic or commercial explorations in the United States. The Spanish operated primarily out of their settlements in northern Mexico and the Rio Grande valley. Russian explorers moved down the Pacific coast from their fur-trading establishments in the Aleutians.
