First of all, plastic is not truly recyclable, it is down cycled. Sure, it may be reprocessed into another product, but eventually that product will wind up in the landfill or ocean. The book begins talking about all the wonderful things that come from crude oil. The plastic bottle is so excited to be made into something from this oil. Great information about plastic bottles that are recycled. But what happens to the majority of plastic bottles - they are not recycled, but just thrown away. I wish the book also described the sad adventures of an unrecycled bottle and what effect it has on our environment - that will catch the attention of both children and adults even more (especially if we consider that almost half a plastic bottle of oil is needed to make just that one plastic bottle)! Great information about plastic bottles that are recycled. But what happens to the majority of plastic bottles - they are not recycled, but just thrown away. I wish the book also described the sad adventures of an unrecycled bottle and what effect it has on our environment - that will catch the attention of both children and adults even more (especially if we consider that almost half a plastic bottle of oil is needed to make just that one plastic bottle)! Fun pictures and cute story to engage younger students and great, accurate text to inform older learners. Provides a nice, concise overview of resource extraction, use and recycling, all in an interesting way. I alter how I read it depending on students' age, but use this with grades K-5. First of all, plastic is not truly recyclable, it is down cycled. Sure, it will be reused and turned into another product, but eventually that product will wind up in the landfill. The book begins talking about all the wonderful things that come from crude oil. The plastic bottle is so excited to be made into something from this oil. It is then used for a while and then turned into another product. As an educator and environmentalist I feel this book gives the wrong perception of plastic. We really need to be focusing on our over consumption of plastics
