#### Description:

*Research Methods for Public Administrators* introduces students to the methodological tools public administrators and policy analysts use to conduct research in the twenty-first century. Full of engaging examples and step-by-step instructions to illustrate common research methods and techniques, this book provides future administrators with an unshakeable foundation in model building, research design, and statistical applications.

## New to the Sixth Edition:

- Sections addressing recent developments in research methods, such as Big Data and Exploratory Data Analysis
  - Expanded coverage of digital media, including internet surveys and survey data collection by tablet computers
  - Greater focus on qualitative research methods and their strengths and weaknesses relative to quantitative methods
  - Updated study items, knowledge questions, homework exercises, and problem assignments for each chapter
-

It is solidly grounded in public administration and recognizes both the promise and limitations of research within a political environment. Key features of the book: --It is highly practical and written to accommodate a mix of readers: those who want to become analysts, managers who will oversee research contracts, and citizens who need to know whether to believe the facts and data they read in today's news; --It minimizes the use of jargon and explains difficult concepts in clear language.Â This book demystifies and makes practical the research every public administrator and policy analyst needs to do the job well. Online instructor's materials, including a Test Bank, PowerPoint slides, and a Survey and Documental Analysis (SDA) guide, are also available to adopters. Only RUB 79.09/month. Research Methods for Public Administration Midterm Study Guide. STUDY. Flashcards.Â Research is a systematic search for answers to questions using a clearly specified process for gathering and analyzing data. It is empirical (i.e., derived from experiment, observation, or experience). What are the three interrelated phases of research? 1. Planning- Determine the issues and research questions; select measures; select an appropriate design; develop a data collection strategy and instruments 2. Doing- Gather the data; analyze the data; verify the accuracy of the data and analysis; and formulate the findings. vi Edinburgh Business School Research Methods for Business and Management. Editorial Reviews. Review. "Research Methods for Public Administrators is presented in a clear and comprehensible fashion which enhances the ability of even those with limited knowledge of research methods to understand the topic. The book is well structured, covers the topic with a minimum of jargon, and is designed to develop the critical thinking skills of students. Many examples of research concepts that are relevant to public administrators make the book extremely useful for students and practitioners alike." - - William Leavitt, Old Dominion University. "Research Methods f... Magazine article Policy & Practice of Public Human Services. Research Methods for Public Administrators. By Johnson, Gail. Read preview. Magazine article Policy & Practice of Public Human Services. Research Methods for Public Administrators.Â Research enables public officials to engage in a rational approach to decision-making. A rational approach assumes that decisions are based on an accurate picture of the problem and the likely consequences of various remedies. The truth depends upon the ability of public administrators to objectively gather accurate data and interpret information. Research Methods for Public Administrators helps administrators do that. The book informs the political debate and contributes to policy formulation and program management.
